

NO WAY TO RUN

(Music: D.G.I.; Lyrics: Marc Steeil)

Heheh, do you think you're faster than me? Fool!
I got no worries, everything seems to be ok
My revolver is ready to say "hello" again
I can smell the fear dancing on your face
This duel's superfluous.. I will win today.. ahh

I will leave you no way to run
Begin to pray, hey gringo it's time to say goodbye
Today you'll die

How dare you show me that perky face of yours?
Still a flstful of seconds...and then the bullets sound
No one else's survived to me... you won't be the first
I've got thunders in my hands...This time will be your end!

I will leave you no way to run
Begin to pray, Hey gringo it's time to say goodbye
Today you'll die! My gun is hot, I need to shoot
Between your eyes, No way to run... you'll fall in hell!!!

Look at my face! The time has come
Come on, right now it's time to shoot
Come on, now, shoot

SO FAR AWAY

(Music: D.G.I.; Lyrics: Marc Steeil)

All that has been in past, all the things we've done
Are sleeping in the silence, everywhere I go.
Now I feel myself so tired, I only need to rest...
But deep inside of me... I can see you
I remember moonlight on the sea
And all that your eyes said to me
I remember your glance through the rain
Now it's all over and you're gone, you're not here with me

I feel the rage deep in my blood (I miss you in everything I do)
Cry... it's all I can do (I'm living my life just for you)
My heart pumps poisoned tears (I cannot live without you)
God wake me up from this frightening dream...
You've never been so far away (I'm not ready to lose you)
You've never been so far away (I cannot live without you)
Since you are so far away
I only wanna believe that you will be back some day...

In front of me a long way back home (my eyes only need to rest)
Walk... it's all I can do (for you I'm dying in this street)
My feet touch faded stones (a pale sun laughs at me)
I can't go on...

You've never been so far away (I'm not ready to lose you)
You've never been so far away (I cannot live without you)
Because you are so far away
I feel the rage so deep in me, this nightmare is killing me...
I
All that has been in past, all the things we've done
Are sleeping in the silence, I cannot see you

NEWS FROM THE PAST

(Music: D.G.I.; Lyrics: Marc Steeil)

Dear mama, I'm writing alone in this darkened room to ask
you news from the past
How are you? It's been a long time that
I do not hear your voice, time is passed too fast
Tell me more about my father.. (set free my roots)
And let me imagine his face.
Tell me more about my birthday (set free my soul)
It's time to clarify.

Fly high... dream of love I will not feel your taste, 'Till my night will be passed.
Fly high... letter from my heart and bring to me, answers that I need.

Tell me why I feel this anger, and why I can't go on.
I want to know all about his absence. I will not compromise!
All I got it's just a piece of a broken life
Mama as you can see I'm going to lose my mind
All I got it's just a piece of a broken life

You see, he wrote at last. Umphh, you dupe! No good news are news from the past

My child It's strange to read from you... what's the matter son?
It's a thing you've always known...
It's so cold in this building, now I want you to know, How the things been gone...
I remember when your father came to me and he took me by force
I still remember his face
All my projects and my dreams Crashed to the ground only tears and anger...
It was the end for me...

Fly high... memories of a mother, bring to him answers that he needs
Fly high... Cross the mountains and whisper to my son
The cruelty of these words:

Can you remember the face of the girl you've dated for long,
I heard she moved to the town.
Your father owns that place and he fell in love for her
He married her my son.

I hope you understand (How am I supposed to understand, he stole my love)
But I never found the strength (I will find the strength to take my revenge)
I hope you understand (I'll never understand, no, I won't understand!)
Forgive me son.

MEET IN THE NIGHT

(Music: D.G.I.; Lyrics: Davide Sgualdini)

Here I'm walking in the streets,
too much need to meet my Love,
cannot let Him find me there. He wouldn't let me live anymore
Gotta find a way straight in, wish didn't have to come in here
Need to feel your tenderness, my dear Love I'm coming right to you!

Oh my darling I miss you so much,
I need you to hug me tight in your strong arms.
I wonder where are you, where would you be now,
If only I could reach you, I'd run with you now!

Crossing now the border fence
There, there is the main entrance door
Too many guards on its defence. Cannot break in silently
Better try the garden door
No guards seems to be checkin' in there
Hey there she is in the backyard!
My dear Love I'm almost right in front of you!

Oh my darling I love you so much,
now that we're together we'll never split up
Oh my darling I love you so much,
now that we're together our love will guide us

What's she doing in the backyard, is she trying to run away from me?
I'll never let her go back to him
she's now my wife and I want her for me
She should be grateful I've chosen her,
I will make all her dreams come true.
What does he still want to get from her,
My dear Love I'm coming to find you!

Oh my darling I'm worried so much,
I wish you could hug me but what if He comes?
I wonder if He sees us, what'd happen that way?
May God help us here safely finding our way!

Oh my darling I love you so much,
now that we're together we'll never split up
Oh my darling I love you so much,
now that we're together our love will guide us

Ah, there she is! What?! What is He doing here!
What is she doing!!! Aargh!!!

What are you still doing in here? You'd better to disappear
Oh it's too dangerous to stay, I'm seeing her husband coming this way

Oh my darling I love you so much,
now that we're together we'll never split up

Oh my darling I love you so much,
now that we're together our love will guide us

Please flee, my sweetest, it's time for thou to depart!
-Let my counselling voice penetrate into your hearts-

Yes I think it's better to go, I feel this place's not safe anymore

MINDSTORM

(Music: D.G.I.; Lyrics: D.G.I.)

I'll rip your veils of loneliness,
crossing these walls, thick and high.
Bride of the eternal game, I'm the one who claims our love
I'm the one, I'm thick and high,
eternal game, I'll rip your veils

I'm the cancer inside your brain!

I'll rip your veils of loneliness, crossing these walls, thick and high.
Bride of the eternal game, forgive me, but now it's time to change!

TRAPS IN OVERTURE

(Music: D.G.I.; Lyrics: Giorgia Goccardi)

Lives beaten by urban time pushed by unheard passions crawling
under skin in silence gnawing
a flower slowly withers bended by urban time

Repression - lack of air for the grudging love
Ambition - of others makes you feel sore

You're just a pawn, make your move!

Vestal of longing prays for what seems to be lost
lifetime struggle starts to consume her soul

But a voice comes to lighten my heart at night
behind walls thick and high, behind veils of loneliness
Feelings surge under pressing thrall
oh, wandering dreams and memories
bride of the eternal game lies softly fall.

Repression - lack of air for the grudging love
Ambition - of others makes you feel sore

Oh she enchais me with hope,
gasping breath,
bittersweet dope, swallow-dive into swampy thoughts
